

+PLUS PATHWAYS HEALTH POLICY

A unique added value opportunity

The field of Health Care encompasses knowledge and abilities from many disciplines. Critical thinking and research skills, clear and focused written and spoken communication, creative problem solving and personal and professional interaction with a diverse population are highly desired by employers. Add this +PLUS to your Bachelor's degree to direct your academic strengths and talents in the growing field of Health Policy.

Why +PLUS Health Policy?

- Apply your knowledge of science with your desire to improve health care delivery.
- Acquire the personal and business skills to link science with the patient or client.
- Career options include governmental and non-profit agencies at the global, national and local levels, health care organizations, health insurance companies, community health, private industry and educational agencies.
- Graduates are prepared to work with a diverse population in the US and globally in a variety of health care related fields.
- Students who maintain a 3.0 GPA are fully prepared for application into Daemen's Master of Public Health program.

Explore your World of Opportunity

- You can accompany Health Promotion, Physician Assistant, Physical Therapy and Athletic Training faculty and students on community health service learning in Haiti, the Dominican Republic, Kenya or Uganda during January term or spring break.
- You can study critical world languages – Chinese, French, Italian and Spanish – and take part in exciting study abroad opportunities in Asia, Africa, Europe and the Caribbean related to global health issues.
- You can participate in a community health related Service Learning or Internship.
